for a few years will give one a clear insight into what the future has in City Receiving Special store for Glendale.

Glendale's percentage of growth in population from the census of 1910 to 1920 was not paralleled in the United States by any city during the same period. With a record goin of 392 per cent given by the Cuts in the present service were United States census, Glendale was placed at the top.

WHILE this was an extraordinary gain, it does not compare with the gain made since the census. The population as given by the United States cenus of 1920 was 13536. If the same Department advises, owing to use of 1920 was 13536. sus of 1920 was 13,536. If the same percentage of gain is recorded between 1920 and 1930 the population will be 66,596. If the gain from 1920 to 1922 is taken as a basis of growth Glendale in 1930 will be a growth, Glendale in 1930 will be a city with 120,000 inhabitants.

HERE are numerous reasons (Signed) "Walter F. Lineberger. for expecting this growth to continue, for while the population has been breaking records the building activities have been

weeks.
The fact that the Pacific Electric
Railway has been circulating a petition to use in its application for a franchise to run busses over the sireets of Glendale was the cause of considerable discussion pro and con. The majority of members who spoke on the subject were against tieing up the city streets on franchises in favor of any particular company. There was a strong sentiment expressed for a bus line to be owned and controlled by local merchants, many of whom ex-pressed themselves as favoring the project. "We do not need to dis-cuss running busses into Los Angeles now," said a prominent mem-ber of the association, "what we want is feeders for Glendale's business district. A bus line that picks up people and dumps them at the fire hall on South Brand does Glendale business interests very little good," concluded the speaker. Ed N. Radke, chairman of the

SANDERS MADE

E. F. Sanders, who has been serving as assistant secretary of the Glendale chamber of commerce, was selected at the meeting of the board of directors at 2 o'clock this afternoon, to fill the vacancy of James M. Rhoades, who resigned that position at the meeting of the board last week. Mr. Sanders will take up the work of sec-retary when Mr. Rhoades turns it over on April 1. Mr. Sanders will continue at his present salary of \$300 per month. It is understod that a new assistant secretary will not be appointed.

This move on the part of the directors of the chamber will cut the money expended for salaries by the chamber by \$400 per month.

LOS ANGELES, Mar 20.—De mand for immediate construction of the tunnel leading from Hill street station to Glendale boule vard, approval of bus line service rates of the Pacific Electric railway, and apparent disregard of the proposal to make Pershing Sanara a subway center for Los Angeles are points in the report of the board of public utilities made pub lic today.

Copies of the report, which is lengthy and contains the results of the inquiry into the transportation problems confronted by the city were sent to the Los Angeles and Pacific Electric railways today with instructions that the companes file answers within ten days

"A dozen or more applications are now before the board of public utilities asking for bus line fracchises," reads one part of the report. WIRE SCREENS PREVENT EXPLOSION

[By Associated Press]
CHICAGO, March 20.—Discoveries of far-reaching importance to industrial concerns and others handling inflammable solvents such as gasoline, ether, alcohol, amyl acetate and light oils, have been announced by the Fire Underwriters Laboratories as a result of a study of the fire danger from volatile liquids.

Screens of fine liquids, copper or silver mesh, the chemists dis-covered, will prevent the spread of flames through vapor-filled pipes conecting storage tanks of the highly inflammable liquids. The investigation was undertaken at the request of one of the world's largest explosive manufacturers to reduce the fire hazard in his ies, but the discoveries will be applicable wherever dangerous solvents are handled.

The experiments covered flat and cone-shaped wire screens in pipes of from one-half to six inches in diameter, and showed that when properly applied the screens would halt the flames, although the rest of the pipe was filled with a dangerous vapor mixture. Mixtures of ether and air proved the hardest to control, gasoline being next in order, followed by acetone, alcohol ight oil and amyl acetate.

The investigation also included benzol, toluol, turpentine, kero-sene, amyl alcohol, acetic acid, aniine, nitro-benzol, glycerin, linseed oil, cottonseed oil, palm oil, paraf-fin oil, chloroform, lard oil, camphor and phenol.

Russia was again alarmed at this agreement, but nothing came of it, as Turkey soon entered the World War on the side

of Germany.

According to one authority, the cause of the Turkish-Greek war lay in the Greek aspirations to redeem traditional Greece, these aspirations being backed up by Britain. At one time, years ago, Asia Minor, the shores of the Black Sea and of the straits and of the Sea of Marmora, were Greek. Constautinople was also largely Greek. Dr. Hadden to Speak

Dr. Robert A. Hadden will speak again at the Glendale Presbyteria, church at 7:30 tonight His mes

The Men's Brotherhood of the church and the Session, invited Dr. Hadden to conduct these services, and much of the responsibility for the interest and attendance is due to the men. The services are expected to grow in the responsibility and the services are expected to grow in the services are grown in the services are

ices are expected to grow in interest and enthusiasm until the closing service on Sunday night.

At the 2:30 service this afternoon

Dr. Hadden spoke on "The Prob-lem of Jonah." Was it a miracle

or myth? At the same hour tomorrow he will speak on "The Problem of the Gospels." Is there a specific divine purpose in the present arrangement? The attendance at these afternoon services

has increased to such an extent that it has become necessary to conduct them in the auditorium of

the church. In addition to the address itself, the question and an-

swer method is bringing out many perplexing personal problems which are cleared up by scripture and the wide experience of Dr.

The subject last evening was "Prayer." Prayer is the Chris-tian's birthmark. It is a divine characteristic. Jesus Christ was

a man of prayer. No other charac-teristic was more marked in Hin.

When Ananias was sent to Saul

after his conversion. God said, "Behold he prayeth." God had blazed the way into that man's heart as He does into hearts to whom He asks us to speak today.

As the helitrope turns to face the

sun from dawn until darkness falls, so the true Christian faces his God and Father until life ends. Prayer is a Divine Heritage. It

is the believer's birthright. He is

glory and honor. God has blessed

us with all spiritual blessings in

the heavenliness in Christ. They

who know how to pray have left the deepest imprint on the sands

of time. A great leader said, "I wouldd rather train ten men to pray than one hundred men to preach." Who has looked into

God's face knows best how to preach His message.

What will prayer do? Bring help in time of trouble. In Minnesota

the grasshoppers destroyed the wheat crop two years in succes-

tions began again. Gov. John S. Pillsbury, a Christian man, proclaimed a day of prayer for relief from the plague. Though infidels scoffed and many questioned, many thousands prayed, and as they

Listen Folks!

Can you spare eight minutes?

ing. Twenty-five years ago Science gave to a sick and suffering world Chiropractic and in the brief space of 25 years millions have, through its wonderful benefits, been made strong and well; and today 15,000 loyal men and women are healing and curing thousands by this marvelous science. Yet, as wonderful as is the great Science of

Chiropractic, its effici-

ency and usefulness is

doubled when com-

bined with the scien-

tific use of Electricity in the treatment of disease.

Dr. Wyly, Burbank's new Chiropractor, is getting some wonderful results by his combined Chiropractic and Electrical Treatments. Men and women, many of them who had decided that nothing could cure them, have come to Dr. Wyly and are getting well. No one has a right to give up hope until they have seen and consulted with him. He makes no charge for Consultation and Examination.

Dr. Wyly is a very busy man, but he still has a few open dates

so, if you are not as well as you feel you should be, you owe it to yourself and your loved ones to see him. He will very quickly and frankly tell you whether or not he can help you.

Dr. Wyly's combined Chiropractic and Electrical treatments are especially good in stomach, liver, lung and kidney trouble; asthma, constipation, high blood pressure, nervousness, female trouble, enlargement of prostate gland, piles, headache, backache, rheumatism—and a great many other human ills. There are a lot of people getting well through his treatments—you can just as well be one of the number as not.

You don't have to suffer as you do. Then why do it longer? The longer you put off the matter, the longer it will take to cure you. Don't hesitate any longer. See Dr. Wyly and have an examination. He will be glad to see you at any time. His office is Rooms 2 and 3, Olson Bldg., 221 East San Fernando Blvd., Burbank, Calif. Telephone Burbank 174-W.

PAIN

The Sun Can Play Havoc with Your Home

MERCILESSLY, the blistering heat of the summer sun bakes your house. It needs protection, the lasting protection which can be secured by painting with Patton's Sur Proof Paint. This durable paint seals the surface with a tough film that for many years beyond the life of ordinary paints, will serve you faithfully.

Sun Proof Paint covers an unusually large amount of surface per gallon; in the end it costs much less than the "cheaper-per-gallon" material. Sun Proof is one of the quality paints, varnishes and enamels that we can supply for your immediate use. Tell us what the job is, we will do the rest.

The people of the United States are not maintaining the postoffice in the hope of making money out of it. It is for their convenience, and the promotion of general business interests. A postoffice is not to be conducted on the plan of a grocery. The running of it is not to be classed as a gainful occupation. It is not looked upon as the direct producer of dividents. It would be pleasing, of course, if the postal service paid for itself, and was able to show a balance. The demonstration is complete enough that it cannot pay for itself subgrated as to serve the approximation of the product of the postal service. for itself when so directed as to serve the people adequately. It is one of the luxuries for which the people are ready to pay. They ask for good service, and they would not grumble at the cost. They grumble at bad service, no matter how cheap.

AS THOUGH TO LIVE FOREVER

Alluding to the certainty that all individuals must pass away, a writer avers, with implied reproof nevertheless we go ahead with our little plans as though we were going to live forever."

There is a life on this globe forming a continuous stream. Individuals drop out, but the stream moves on. Just so a river, coursing to the sea, does not pause because evaporation claims some of its elements. To plan as though to live forever. is simply to contribute to the aggregate of well-being; the drop is doing its part to maintain the volume of the

It would be singular were mortals to say, when faced by the opportunity of effort "What's the use? I'll be gone tomorrow." That would result in a world not fit to live in even for the brief mortal span. Each generation would be inspired to curse the one that had gone before, and be bidding for similar treatment from the generation to follow. If one living in the world succeeds in adding to the beauty, the comfort, and so to the joy of existence, he has accomplished more for himself than had he idly bewailed the receipt of the contrary he had by means of an inflamed to the contrary he had by means of an inflamed of your enemy neither well of yellow and the chance of the yellow and the chance of the yellow an faced by the opportunity of effort "What's the use? the necessity of abiding here for a time, then an-

People do conduct themselves as though they expected to live forever, because deep in their souls there is such belief. And if they were in error as to this aspiration, yet would the world be better and finer because of their having cherished it.

He wanted to play the races; the girl wanted to lay strip poker. Neither counted on taking the results of failure which, in every game of chance somebody must take. The girl died and trouble in this world must not be born in it.

There is only one time when anybody ought to play a game of chance and that is when he or she has faced the worst and decided to accept fully every loss that the game can bring. If we did

ALL TOURIST SEASONS

The old-belief that southern California was a winter resort only, has passed away. While the hotels this winter are crowded, great throngs are expected later.

Preparations are being made for summer tourists.

Probably there are many accustomed to come in winter who will continue to do so. These are men of goes over the road.

But we love to fool ourselves and so we will not look at the end of the game. It comes, however, and the "sure thing" player takes to death or goes over the road. large affairs who find that the winter affords them release from commercial routine. Their interests are such that they must have personal supervision at the

busiest part of the business year.

Formerly tourists were misled by the mildness of winter in this region. They thought that where it was possible to have a New Year flower parade, that surely the summer, being relatively higher in temperature, must be a scorcher. Therefore, consulting the calendar they started for the east, not daring to put the matter to test by experience. And in the east they had to swelter in a fashion not known to Californians. Gradually some of them acquired the habit of lingering into spring and then into summer. They were amazed and delighted to find themselves in contact with climatic comforts they never before had known

Some of the thriving beach cities are now more famed for their summer than their winter attractions. Thousands of people have adopted the practice of being regular summer residents. Out of these thousands a large number elect to become permanent residents. Thus these cities grow and the fame of them, going afar, is a benefit to the whole state.

Five women are on the jury now considering the case of the Oregon night riders charged with crimes of violence. This is believed to be the first instance of the kind, although women have served as jurors in cases of almost every type. As a rule they have proved themselves fair, and less swerved by sentiment than the men associated with them.

A girl who sits and waits for a man to propose must feel a good deal like the cat that is watching a rathole.

EXPRESSIONS OF OPINION

It is held by some commentators on current events that men are being executed in Ireland for their opinions. They hold also that in the Ruhr the same cause accounts for the hardships which the German population is experiencing. The implication sought to be made is that no other principle is involved; that the right to have and to express an opinion is not subject to condemnation. Take such a view of in-herent human privilege, and the whole penal code ecomes an anomoly. There is no wrong; there is no deed of violence that is not in itself the expression

In a certain country, not necessarily Ireland, for the matter may be considered in the abstract, a form of government agreeable to the majority has been set up. The minority declines to submit. On the contrary it kills the representatives of the majority from ambush, blows up their dwellings and places of meetings, puts the torch to their stored crops. In this manner the members of the minority express their opinion. The commentators mentioned contend that In various cities there are complaints that the mail they are not to be censured, much less penalized service is being crippled in the name of economy. There is talk of a purse of \$750,000 for Dempsey if he will go to South America and there meet the leading heavyweight roughnesk of that region. Other emoluments are mentioned. However, there is not the slightest indication that Dempsey wants to fight

Somebody calls attention to the fact that neither the United States nor Argentine would pay \$750,000 to see two great scientists engaged in intellectual contest. "That shows where civilization stands" is

A most absurd conclusion. Neither government offers to pay a pair of ruffians \$750,000 or any other sum for getting into the ring. A few speculators, knowing how easy a matter it is to winnow the coin of suckers, would pay the money, for the sake of the larger amount that would cling to their own fingers. The presence of the comparatively few who esteem a prizefight, has small bearing on civilization. There are undesirable social elements, civilization no more than it is represented by the

Meanwhile the United States, government, and presumably that of Argentine also, is expending large sums in promotion of scientific research to the end that human life may be prolonged, and human comfort promoted. The prizefighter counts nothing in the scheme, except that living without work, he fills no useful office and is likely to be counted as a parasite.

Word is cabled that Germany is ready to talk with France as to terms. Before the opening remarks, however, the French are to withdraw from German territory.

If this is realiable news, the talk may be regarded as postponed to the indefinite future. It hardly is probable that France marched up the hill for the purpose of marching down again. Nor is the assurance absolute that having got rid of the invaders, Germany would not again go into the silence.

Not so much has been heard lately of the soviet army that was to undertake the job of sweeping across Europe and bringing order out of chaos as it advanced. Possibly the plan has been delayed by the illness of Lenine and Trotzky at once.

Certain legislators from the north seem to be learning that the state has a constitution, but not yet to be aware what the document is for. That it should be permitted to interfere with their personal schemes, strikes them as an absurdity. According to the constitution there should be a new congressional apportionment. According to the census, this would operate to give the south end of the commonwealth a greater

But after all, what is a constitution? Merely words printed on paper. And what is a census of population? Nothing but figures compiled by a set of clerks. And what is the virtue of being politically honest? Ask the San Francisco delegation and hear its merry laughter.

An arrangement was made at a meeting of the k. k. k. in Kern county to run a certain taxicab driver out of town. Perhaps he was not a good taxicab driver. Possibly the meter of his vehicle lacked precision. Anyhow they decided that he had to go.

The matter got into court and there was a conviction. An appeal followed, and the appeal has been sustained. This showing that the machinery of the law cannot be knocked out by the k. k. k. must be comforting to citizens of Kern who wear their shirts tucked in.

BY JOHN DILGRIM

Maybe Herbert Hoover didn't say it. But people say he said it. The value of the story to me is that it points a moral. "The seven members of the Colorado River Commission, repre-

senting seven states, could not reach a decision," people say Hoover said. No wonder that they could not reach a decision. Millions of money, the happiness and prosperity of millions of people, the business interests of seven states for centuries to come were in their hands.

"So I marooned them in a little hotel out on the desert," people

They debated some more. The seven commissioners had each brought boxes full of his own private brand of cigars. They smoked those cigars up. Herbert Hoover then produced boxes of cigars. They smoked those cigars up. By this time they had reached an understanding of the various elements of the problem. All that remained to be done was to get together.

"When they had smoked up all the good cigars," people say Herbert said, "and had agreed on a statement of the problem, I produced boxes of the worst cigars in the world,"

Mr. Hoover, they say, gets almost morbid when he thinks of those cigars. They were made, he says, to be smoked in an old-fashioned oak leather tannery by a man who detests the small of tanning. Under the smoke screen the tannery seemed to him a bower of roses. Hoover gave them out with a lavish hand.

"In seven days," people say he said, "they had signed the document." say Herbert Hoover said.

There is even the possibility that the rain demand may exceed the supply in certain districts and that there will be nothing for the government to do but name a Federal Rain Commissioner and see that a quota of so many showers per community is arranged for. During a hot dry summer there may be, as a matter of fact, a sixweek advance sale.

There will be great opportunity for the satisfaction of personal icalousies, too. When the Elks go to the beach for the annual picnic all the men who were blackballed during the season can hire airplanes and see that they get terrible weather. There will be great opportunity

All things considered, the following weather report is quite probable the coming summer:

WEATHER REPORT Sun rises—5:10 (subject to permission of war department.)
Sun sets—7:55 (by arrangement with McCook Aviation field.)
Moon rises—(time to be decided upon by faculty of Cornell college).

Moon sets—(matter now under discussion by congress).

LOCAL FORECAST-Fair up to 11:45 a. m., at which time the chamber of commerce has ordered a delivery of rain. The storm will end promptly at 1:15, so as not to interfere with the matinee crowds.

GENERAL FORECAST-Tomor The general public is watching the experiments with much curiosity and no little concern. The general feeling of the man in the street is that there will be some tall another by mistake.

And it won't be an easy matter for a community to get rain even when the airmen are able to deliver it. There will always be some citizens who will oppose rain just as a matter of policy and of habit. Politics may play a part. One can imagine the Democrats sending some aviators up to produce rain and the Republicans rushing up some aviators to stop it. Some great air battles should delived the plans for this storm on this day, but can only say that the order was placed three weeks ago. In the middle western states clear weather will prevail except in communities where government air men will be filling back orders for rain. West of the Rocky Mountains it was intended there should be rain tomorrow afternoon and evening, but it will be impossible to carry this out due to the fact that the aviation officer in charge is laid up with rheumatism.

[By Associated Press] MOSCOW, Mar. 20 .- The revolutionary tribunals which, along with the dreaded "Cheka," were instruments of red terror during the worst period of the Bolshevist revolution, passed into history the other day when a new and permanent court system was inaugurated throughout Russia. While founded upon lines not unlike those of the court systems of some other European countries, the new Russian courts have some particularly communistic features all their own. JAMES W. TOLEY

The Supreme Court of Russia, which will sit in Moscow, will have

IN A GARDEN OF YEARS

A little lass among the flowers One day in leafy June, Plucked blossoms through the sunny hours And hummed a lilting tune:
"This is for friendship," so she said,
"And this for love, I say,"

"This is for days of happiness. And this for blue, blue skies; And this for dreams that come to bless The heart with memories.

And so she shook her curly head And fashioned a bouquet.

This is for joy from sun to sun And this for olden days When light and song were never done, Along the sunny ways.'

And so she stooped and plucked the flowers And with her fairy feet She danced all through the sunny hours With glad, glad smiles and sweet. And when she held her flowery prize She said: "These are my years," And then I looked and saw her eyes

Were shining wet with tears.

And when by me she came to pass I bowed so very low, And said: "Your name, my pretty lass,

Pray tell me ere you go." She held her flowers tight the while And looked from them to me And then she whispered with a smile: "My name is Memory."

The convention was held last year in Toronto, when George Ross, commissioner of finance of that city, was elected international president, and the - Canadians will return the Americans' visit this summer by sending a record delegation on the

long trip.

One of the features of the Canadian invasion will be the famous brass band of the Forty-eighth Highlanders' regiment, which fought over-seas throughout the war. The Highlanders will give concerts in many cities along the route, dressed in their uni form of Scotch kilts.

Indications are that the Atlanta convention will be the largest ever held by Kiwanis. The interna-tional program committee met recently in Atlanta, made a tour of the city, and completed a program business and entertainment which will occupy almost every moment of the time. One of the entertainment features is to be an old-fashioned Southern barbecue, cooked by noted ante-bellum ne groes over open pit fires, at which 5,000 persons will be served, while a glimpse of the "Old South" will be seen in "Plantation Days," a nusical revue which will depict he customs of other days.

Atlanta, in true Southern manner, has issued a special invitation to the wives and daughters of Kiwanians, and a big committee of ladies will look after their enter-tainment while the men are en-gaged in business sessions.

orite airs are the old love sones of 20.—Community sings are peculiar long ago, according to Mitchell things" says R. O. Mitchell, leader But the mixed sings, where both latest popular airs.
